

# CDC Provides Warming Center for those without Power

Posted on [March 26, 2011](#) by [admin](#)

For the past several days, the CDC has provided a warming center for the community. With power, the CDC office provided residents with a warm place to go, internet, hot showers and food. Volunteers manned the office and cooked food. Of particular note, Sarah Rah, put in a big effort to make the warming center a reality. We all thanks her for her efforts.

To find out if the warming station is open, call the CDC office at 877-2244 or Sarah at 877-7272.

Channel 30 did a story on North Fork and mentioned the warming center. See minute 2 of the following video.
